- Founded in 2011 with offices in USA and Gurgaon, India
- More than sixteen satisfied clients in US, Europe, and India
- Team: Seasoned telecom and platform software engineers with extensive industry experience.
- Business Verticals
 - Network Infrastructure and Mobility
 - Embedded and IOT Systems
 - Network Virtualization Function and Cloud

Network Infrastructure and Mobility

Mobile Platform & System

- Telecom Small Cell Infrastructure Development
- Device and Security Management Service
- Silicon Chipset Platform Integration
- Device Diagnostics System Development
- 3G /LTE Protocol Development

Mobile Application Service

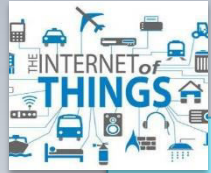

- End-to-End Application Development for Android / iOS
- Integrated Enterprise Application
- Transform Web to Mobile Application
- Robust and Proven Deployment Model
- Mobile Application Development with SMAC and IOT Device Integration

Mobile Testing Services

- Mobile Test Strategy and planning
- Mobile Application Test Automation
- RF and Protocol Conformance Testing
- Device Adaptability and Usability Testing
- Application Store Compliance Testing
- Mobile Feature and functional Testing

Internet Of Things

Sensor & Embedded

- Sensors and Peripheral Platform
- Zigbee and Zwave
- LoRA devices
- ESP2866
- Brillo and Weaved , Thread Protocol
- Sensor and HW board

Gateway Development

- Gateway integration with ZigBee , Zwave , BLE and LoRA
- Integrated with Cloud Server using MQTT/COAP Protocol
- Application Ready Automation Platform

Cloud Development

- Cloud Server for Subscriber Management
- Device Management
- Event and Log Reports
- Framework Ready for IOT Gateway
- Framework Ready available for customized application
- Home Automation Application Server
